Join ADI and Wade Bussey from Proficient for an informative Training Seminar. If you're in sales, system design, project management or installation you'll leave with a better understanding of how to get the job done. Lunch will be provided.

Join us and learn:

- New ways to make your jobs more efficient, profitable and completed on time.

Contact your local ADI branch to reserve your space today!

Features:

- Learn everything you'll need to know about designing and specifying Architectural In-ceiling / In-wall speaker systems.
- Learn in ceiling and in wall subwoofer placement and installation habits used throughout the Industry. Also, how to place multiple subwoofers effectively for better Home Theatre performance.
- Understand how to calculate the amplifier wattage and power requirements needed to design a mid to high performance Home Theatre or Audio system.
- Find the out how to calculate impedance, wire gauge and voltage drop before you pull the wire. Also, helpful tips on how to accurately calculate shop supplies needed before the trucks leave the shop.
