Security Networking Webinars

Learn the basics of using networks for physical security device applications through this convenient webinar presentation. In two three-hour seminars, this online training covers the programming, wiring, and troubleshooting of IP-enabled CCTV cameras, DVRs, intercom systems, and other security devices. Hosted by industry expert, SDM editor and security networking author Dave Engebretson, these sessions will provide you with the information you need to install IP security devices.

Dates (courses run from 12pm – 3pm EST):

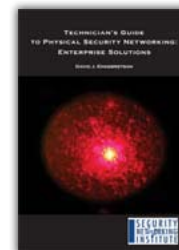

- July 20–21 (Monday & Tuesday)Networking 101 for Technicians, Parts 1 & 2
- August 24–25 (Monday & Tuesday).....Networking 101 for Technicians, Parts 1 & 2
- September 10–11 (Thursday & Friday).....Networking 101 for Technicians, Parts 1 & 2
- October 5–6 (Monday & Tuesday).....Networking 101 for Technicians, Parts 1 & 2
- November 23–24 (Monday & Tuesday).....Networking 101 for Technicians, Parts 1 & 2

Cost:

- \$150 per personPart # 3X-IPWEBTRN
- \$100 per person when 3 or more participants from the same company register.....Part # 3X-IPWEBTRN3

Content Areas Covered:

- Basic Ethernet and Internet functions
- Connection of security devices (DVRs, cameras, intercoms) onto LANs and WANs
- How to test network connections for functionality and available bandwidth
- Internet connection tricks
- Managing client expectations
- IP addressing for LAN and Internet communications

Participants receive a free copy of the Technician's Guide to Networking. **\$50 value!**
